## Description

The MD series laser diode module combines laser diode technology, 3 elements optics and sophisticated electronics within a Slim and light aluminum anodized housing for variety of Applications. Specially, 3 lens structure compensates line beam's curve & unbalance and dot beam's accurate focused point. This series of modules provides a high-brightness elliptical laser beam, and have various wavelengths and optical output power. Applications include a measurement, positioning, lighting, alignment, guidelines, pointing, switching, leveling and machine vision etc. Useful in a variety of medical, industrial, and scientific instrumentation as well as general R&D work.
